DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gause et al in view of Peters.

Gause et al discloses a supine bicycle for medical testing comprising a table tiltable about an axis and having a crank and pedal arm for operating the bicycle portion.

Peters teaches the use of a leg support having a first end which captures a patient's leg via a strap 30 and a second end which is rotatably connected to the pedal arm. In view of the Peters' leg support teaching, it would have been obvious to one skilled in the art to likewise provide the Gause et al device with a similar leg support connected to the bicycle pedal arm.

As to claims 3 and 6, if not inherent in the Peters support, the examiner takes Judicial Notice that is is well recognized in the medical and exercise fields to provide pad means for body engaging parts , and therefore it would have been obvious to one skilled in the art to apply pad means in Peters for user comfort and to reduce skin friction.

Election/Restrictions

3. Applicant's election without traverse of the election requirement in the reply filed on 9-22-04 is acknowledged.

Claim Objections

4. Claim1 is objected to because of the following informalities: Line 3 states "patients" which should be singularized. Appropriate correction is required.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 4 recite structure in the preamble which isn't adequately restated in the body of the claim; therefore it is not understood whether such structure is meant to be positively claimed; or the applicant is attempting to claim a subcombination type claim.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure..
